

Evaluating Websites Worksheet

*For each website you use for your research project, answer as many of the questions listed below as possible.

*Once you've finished filling out the worksheet take a moment to consider all of the information you've gathered, decide if you think the information provided in the site is credible and is acceptable to use as a resource.

What is the URL?

List the author(s):

Are author credentials provided? If so, what are they?

Are citations and references provided? If so, what types of references were used (e.g., scholarly, popular, etc)?

Is the material biased? If so, describe how it is biased.

What is the parent institution?

What is the domain type?

Who is the intended audience?

Are there grammar / spelling mistakes?

When was the website last updated?

Are there links to other websites / resources? What are they?

Is this a website provided by the library? Was it a website found through a search engine (like Google)?
